

KNIFE SHARPENING DEVICE APPARATUS

~~ABSTRACT OF THE DISCLOSURE~~

The invention relates to a pocket-sized knife sharpening device comprising two sharpening bars $[(11, 12)]$ which are arranged in a housing $[(1)]$ and which are rotationally mounted. The sharpening bars $[(11, 12)]$ are guided with the other ends thereof into arc-shaped recesses ~~$(15, 16, 17, 18)$~~ in the front wall $[(6)]$ and the rear wall $[(4)]$ of the housing $[(1)]$. They are loaded onto each other by means of springs $[(13, 14)]$ and cross each other in a knife opening $[(7)]$ which is formed by slits $[(8, 9)]$ extending in a parallel manner in relation to each other in the front wall $[(6)]$ of the rear wall $[(4)]$.
